Introduction

The Chat Protocol Application allows two or more users to communicate to each other using a simple process of login and registration in the school network. This document will provide instructions for the application.

Getting Started ### System Requirements * Same network * Two or more users * Server Chat * Python interpreter * Lib. py TkInter

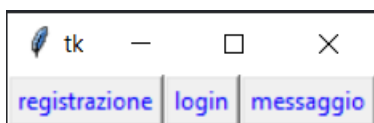

Quick Started 1. Download any python interpreter 2. Download all libraries needed 3. Start Server Chat 4. Start the Application 5. Have 2 or more users create their account and log in

Launching the application

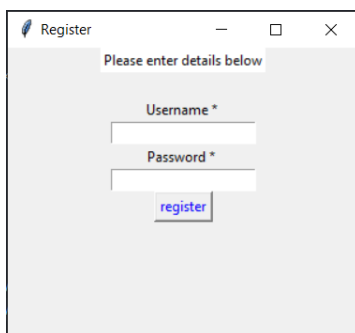

to ensure the app's usefulness, you need 2 or more users and 1 server chat working

Using the main menu

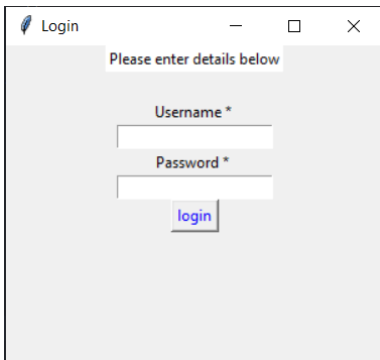

After starting the application, 3 buttons will appear: registration, login and messages;

To start using it, if you have a account, you can do login, if you do not have one, you need to register

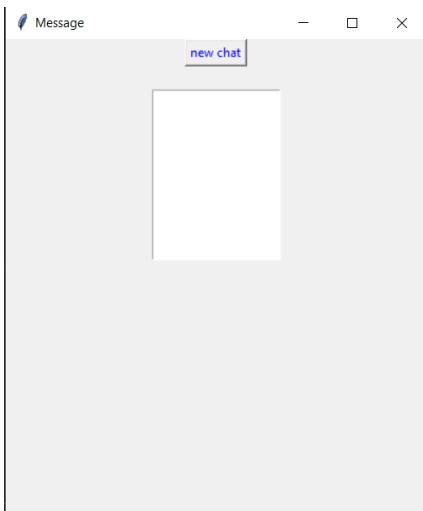

and after you succesfully create an account you can login.

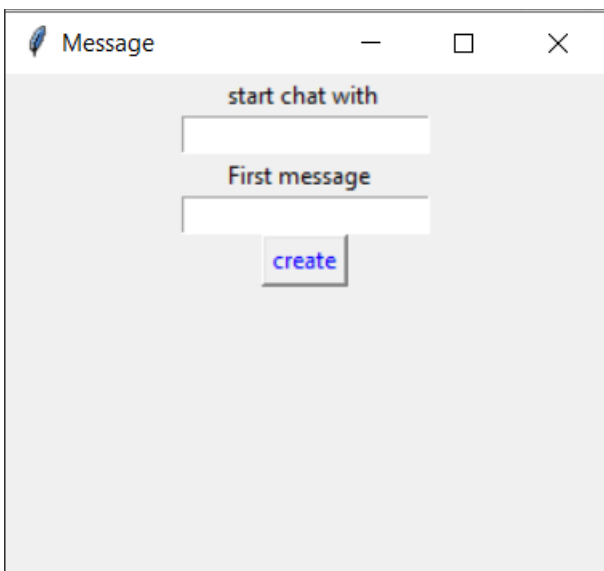

A screenshot of a web browser window titled "Login". The window has a light gray background. At the top, there is a small blue feather icon and the text "Login". Below this, a message "Please enter details below" is displayed. The form contains two input fields: "Username *" and "Password *". Below the password field is a blue button labeled "login".

After the login, you will have access to the message button, where you can start to chat with other users.

A screenshot of a web browser window titled "Message". The window has a light gray background. At the top, there is a small blue feather icon and the text "Message". Below this, there is a blue button labeled "new chat". In the center of the window, there is a large white rectangular area, likely a placeholder for a chat interface.

Click on new chat button, and input the username of the user you wish to talk to, create a chat,

A screenshot of a web browser window titled "Message". The window has a light gray background. At the top, there is a small blue feather icon and the text "Message". Below this, the text "start chat with" is displayed. Underneath, there is a text input field. Below the input field, the text "First message" is displayed, followed by another text input field. At the bottom of the form is a blue button labeled "create".

and open the chat as soon as it is created to start sending messages to another user.
