

PM

JUSTIFICATION

To ease the communication from 2 or more user distant from other

SMART OBJECTIVE

Create a program in Python that you can use like a normal chat app

BENEFITS

easy way to communicate and exchange information for example about a school project without using our smartphone, but both need to be in the same network

PRODUCT

Client application to communicate with another user

REQUIREMENTS

Creation client;  
Server available;  
Using the right protocol.

How use it:

First you need to create your personal account using the bottom right button and only after that you can login;

Lastly you need to open the communication with another user by inputting his username

PITCH

EXT STAKEHOLDERS

TEAM

- Molinari Pietro
- Cristian Bodini
- Di Nunzio Giovanni
- Pareti Nicolas
- Cristenson Igor

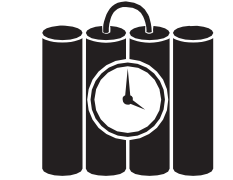

CONSTRAINTS

Follow the directives given to us by the protocol

ASSUMPTIONS

The program isn't complete at 100% but it works nevertheless

DELIVERABLES

RISKS

blocking the server by sending too many packets or using the wrong protocol
