Introduction

Our Chat Application is a simple apply used to chat with another person who is using the same app in the same network. Is very simple start the application all you need is: the last version on Python, a python interpreter to start the app and a server app

Python

Our app was created using Python, it can be installed by this link:
https://www.python.org/downloads/

start the download

open the file downloaded

install it

Set Up the Application

For this we need use a Python interpreter like PyCharm, to start we need open Server app and set our IP, you can see your IP using the command IPCONFIG on CMD: example of IP: "192.168.1.168" and do the same on Chat app
